Analysis

Nurfauzan Hanif

Software Engineer | Data Analyst

PROFILE

Informatics Engineering graduate from Universitas Islam Riau, proficient in PHP, Python, and JavaScript - though never limited to a single language or stack. Experienced end to end, from back-end APIs and web/mobile interfaces to data pipelines, dashboards, and forecasting. Active in campus and community organisations and experienced as a lecturer assistant, with a collaborative approach and a strong drive to keep learning.

EXPERIENCE

Assistant - Regional Strategy & Finance

Nov 2025 - Present

PT Bank Rakyat Indonesia, Tbk - Regional Office II Pekanbaru

Building performance-monitoring dashboards for regional and branch offices in Power BI. Designed and built a monitoring dashboard from scratch with Laravel, Vue.js, Inertia.js, and PostgreSQL. Produced 2026 and 2027 market-share forecasts to support regional strategic planning.

Lecturer Assistant

Oct 2023 - Jun 2025

Universitas Islam Riau

Supported teaching for eleven courses including Databases, Data Structures, Artificial Intelligence, Design & Analysis of Algorithms, Native Mobile App Development, Fuzzy Logic, and Machine Learning.

Chairman

Nov 2023 - Sep 2024

PRIMATECH Programming Study Club - Universitas Islam Riau

Led the campus programming study club; also served as Organisational Supervisory Board member (HM Perhentian Raja) and Event Division Head for the student community-service camp (HMTI).

EDUCATION

B.Eng. Informatics Engineering

GPA 3.76

Faculty of Engineering, Universitas Islam Riau

Thesis - Aspect-Based Sentiment Analysis on the Discourse of Indonesia's Golden Generation 2045 on Social Media Using Latent Dirichlet Allocation and Bidirectional Encoder Representations from Transformers.
